PUBLIC SERVICE IS JOB #1

In today's society speed is King. From the power of the internet to the evolution of the cellular phone, people expect access to tomorrow's information today. Yet Government Agencies are placed in the difficult position of meeting these expectations in the wake of difficult economic times that are producing lower operating budgets and fewer staff while maintaining privacy standards and disaster preparedness.

KIXZO is a powerful Information Management System that empowers Government Agencies with the ability to meet these demands and more by:

Accessing Information Within Seconds

Eliminate the time wasted searching for documents that have been misfiled, placed on a co-workers desk or simply lost. With KIXZO your documents are only a few keyboard clicks away, thereby increasing the productivity of your employees resulting in faster service to your constituents.

Protecting Data Against Disaster

Information is the lifeline of your operations. Therefore it is critical that this valuable data is protected against disaster. KIXZO utilizes an automatic backup system that gives you the ability to safely secure back-up data.

Remote and Secured User Access

Empower your constituents and employees with the ability to access their information online within a secured environment. KIXZO Web is a unique customized approach that allows your users to service their needs over a secured internet connection.
